CAPTAIN VERNOT WITH HIS ABLE MERMEN CAPTURE THE INTERCOLLEGIATE SWIMMING TITLE AND SET A NEW CANADIAN RECORD

Red and White Swimmers Start Evening by Winning the 200 Yd. Relay Race, Making New Canadian Time for This Event—Vernot Scores Fifteen Points and Bourne Adds Ten More to McGill's Total—Wood Leads the Toronto Varsity Squad in Point-scoring—Sports Were Held at the K. of C. Baths and Drew a Large Crowd

THREE records, one of them a Canadian, disappeared into oblivion last night when McGill captured the intercollegiate swimming honours, defeating the representatives of the University of Toronto by forty-one points to twenty-six. The meet furnished plenty of thrills for the spectators and supporters of the Red and White, rejoicing to see last year's decision so decisively reversed, were not hesitant in making the K. of C. natatorium echo and re-echo with the old McGill yell. But though the Blue and White swimmers were beaten, they forced the local students to set a fast pace with the result that records went by the board. The Toronto men did not hang up any new times but they kept on equal footing with McGill for the first five events. They lost decisively in the next two and only managed to place second and third in the last.

The feature of the evening was the lowering of the Canadian national record for the 200 yards relay race. Until last night this had been held by the Detroit Athletic Club, with the time of 1 min. 45.25 secs., but the McGill team, composed of George Vernot, Clayton Bourne, Victor Clarholm and Jim Ross, smashed this by 1.15 seconds and made athletic history. It was a great race and one which will be long remembered.

The other records to go were; that for the 100 yds. breast stroke, and the one for the 100 yds. free style. The former, held by Varsity, was lowered by Captain Vernot, who cut two seconds of the old time, while Clay-

ton Bourne, a freshman, knocked 1.25 secs. off Vernot's time for the hundred. Another feature of the evening was the magnificent showing made by Frank Wood in the fancy diving. This Varsity man upset all calculations by nosing out his team mate, Van Valkenburg, in this event. Both men gave exhibitions which were exceedingly pretty to watch.

Squad Well Balanced.

The chief reason for McGill's recovery of the championship lies in the fact that Coach Vernot was able with his material, to turn out a much better-balanced team than the one that sought the honours in Toronto last year. At that time speed was the one outstanding quality of the squad, but by retaining this, and piling up points in such events as the long plunge and the one hundred yards breast stroke, a different verdict was handed down than that of twelve months ago. Captain George Vernot lived up to his reputation by amassing a total of fifteen points, taking first place in the 100 yds. breast, the 200 yds. free style, and the long plunge. Young Bourne divided honours with Wood, of Toronto, each securing ten points a piece. Wood was the best man for the Blue and White.

The swimmers will continue their activities to-night when they clash in the first of a home and home series in water polo. The game is scheduled for eight o'clock and will take place in the K. of C. baths.

The opening feature event last night was the 200 yds. relay. Bourne, of McGill, and Uren, of Toronto, op-

ened the first fifty and the local man gained a good lead, which was cut down slightly when Clarholm raced against Vennels. Ross had the slight edge in starting against Wood but by the end of the second length this had been cut to practically nothing and Vernot and Keefler plunged together. These two swimmers raced at a terrific speed but the McGill man was the better and the crowd roared its approval when he reached the end of the tank ahead of his rival. And the roar continued when it was announced that the Canadian record held by the Detroit A. C., had been broken. The new time is 1 min. 44.15 secs., which is one and one fifth seconds better than the former record.

Fancy Diving Good

The fancy diving was pretty to watch and a noticeable improvement was noticed in the McGill entries. They were good but in the intricate work of voluntary dives they could not match their rivals, Wood and Van Valkenburg. The Toronto men displayed a finish to their work and for volunteers executed such dives as the pike-leander, the forward somersault with a half twist and the double forward. An upset in the accepted dope occurred when Wood placed first and Van Valkenburg second. The latter won at Toronto last year and it was generally accepted that he would repeat this performance. The line of difference however was so narrow as to be scarcely perceptible. Clarholm was a fairly close third and did some fine work. Hughes

crowd last year and are sure to be even more attractive.

It is in these two events that McGill places her main hopes and the Red and White usually demonstrate clearly their superiority in the proficiency. Last year in this event McGill placed first, second and third thereby netting 9 points. Even if Dartmouth's lead cannot be overcome to-morrow there is still the return

meet in Montreal. McGill decisively won her home meet last year and should be able to repeat the performance.

PSYCHOLOGY SUBJECT OF DISCUSSION

Professor McDougall With Psychological Society

AT R.V.C.

Speaker Discussed Policy of France in the Rhur

"To get at the bottom of the existing trouble of the world, we must think psychologically." This statement was made last night by Professor McDougall of Harvard University in opening his address on "Psychology, Disarmament, and Peace," and during the course of his lecture he showed how psychological argument points inevitably to one conclusion, that one must get at the facts of human nature, and create conditions in which the people will not be oppressed by fear of other nations. He offered as his solution of the problem a World Court, armed with a small but highly-equipped air force capable of overcoming any resistance that might be offered.

Professor McDougall has earned World-wide reputation as a psychologist, and is recognized as one of the foremost authorities in North America on the subject on which he lectured. His visit to McGill was arranged by the Psychological Society, but in view of the universal interest of his topic the meeting was thrown open to the public. The Convocation Hall of the R. V. C., at which it was held, was well filled, among those present being many members of the faculty as well as several prominent citizens. Principal Sir Arthur Currie as Chairman gave a short introductory address.

In opening his lecture Professor McDougall stressed the importance of thinking psychologically. In order to obtain beneficial results, he said, one must regard the facts of human nature. This truism is gaining recognition in various industries in medicine, and in other spheres. All are turning to psychology. In international affairs, however, psychological thinking is lacking. According to some, men are governed by a desire for economic prosperity. All that is needed is a maximum production and an equitable distribution of profit. This fallacy continues to be the fundamental assumption of many of those who are running the world to-day. The history of the wars, however, has falsified the best reasoned anti-

VARSIITY 3—QUEEN'S 1

Kingston, Feb. 8.—The University of Toronto sextette obtained a stranglehold to-night on the intercollegiate championship when they won from Queen's by the score of 3-1. The game was close and very exciting coming to a climax in the last period when the 'vars' claimed a goal, which was disallowed. Varsity has not suffered defeat in the scheduled games to date but has yet two more to play, both against the University of Montreal.

WE THOUGHT we'd drop in on Postmaster Davis yesterday and talk over things. But thinking again we decided in the opposite. For we hadn't the heart to interrupt his pleasure. Tomorrow you see, the tickets for the Military Ball go on sale. And whenever Davis thinks of big dances he just doubles up and stretches out, and doubles up all over again. He smiles, and grins, and laughs, and chorches with glee. Because he knows he will have to get Lizzie full of gas and in fine running condition. He has done it every dance so far. And so he will every dance in the future. For

his phone will ring. He will smile. Then take down the receiver, and holding one hand over his mouth, try to listen. Some girl at the other end will inquire anxiously, "I'm sure there should be a package there for me. Please send it right over when it comes." And Davis will assent quite meekly. Otherwise how will the dear girls get their dresses in time for the Ball?

Daily Illini.

MONTREAL, SATURDAY, FEBRUARY 9, 1924.

A CHAMPIONSHIP IS BROUGHT BACK

After having spent two years in the halls of the University of Toronto the intercollegiate swimming championship is back at McGill again, brought here by Coach Vernot's squad of swimmers. Last night's meet was a pleasure for McGill supporters, for the return of lost honours is something worth rejoicing over, especially when they are won by such worthy rivals as the students from the Queen City. The Blue and White swimmers composed a strong aggregation and gave a great exhibition but could not produce the speed necessary to hold the title. Coach Vernot this year has been in possession of valuable material and he made the most of his opportunities, turning out a well rounded aggregation, which was strong in nearly all departments. The swimmers themselves showed all the effects of careful training and every man on the team gave his best.

But our representatives did not only win the championship. They broke three records, in one instance lowering time set by the Detroit Athletic Club, time which constitutes a Canadian record. Such is a great achievement and the aquatic stars have brought further fame to their Alma Mater. We thank them and offer them our best wishes for success in the annual home and home water polo games, the first of which is being played here to-night.

VISION

The world to-day is calling for men of vision—men who have the faculty of seeing the invisible, and of making concrete that which they have seen in the abstract. For it is such men who do the great things that make the world run smoother.

The founder and other benefactors of this great university were undoubtedly men of this type. When James McGill made his last will and testament, providing the money necessary for the establishment of a seat of learning which Canadian youth might attend, we believe that he had the sight which can pierce the mind of the swiftly-passing years, and that he could discern in his mind's eye a greater McGill—perhaps even the McGill that we know. The men who, in more recent times, gave liberally of their time and money in furthering the aims of the founder, also had a wide vision, and they were privileged to see many of the results of their labours.

Their efforts, however, will have been of little avail, if in the institution which they consolidated, there are not to be found men who are developing the qualities of higher manhood. One of the most important of these qualities is vision, and Dr. John R. Mott give three definite ways of developing it: First, by mingling with people of vision, many of whom can only be found in books, and it is there that their acquaintance must be cultivated. Secondly, by associating oneself closely with Nature, for in her vast storehouse much may be found which is of an uplifting character. Thirdly, by having faith, which is defined as "the giving of substance to things hoped for." And this is the most important source.

We stress the necessity of the development of vision by college men, for it is to the universities that the world is looking for its leaders in these difficult times. Will it find at McGill men of high ideals, who shall be ready to pursue these ideals regardless of adverse criticism because they have caught a vision of a nobler and better existence for the people of the world? The answer, be it "yes" or "no" depends entirely upon ourselves and not upon the world, which is searching for those who may help it into an era of peace and happiness.

SO-CALLED LOST ARTS

Critical writers and speakers who bemoan the so-called "lost arts" of the ancients waste their sympathetic energies, declares Dean William E. Henderson of the College of Arts, who says there isn't much the ancients knew that is not known today, nor anything that they produced that cannot be reproduced today.

"One hears much lamentation upon our supposed inability to duplicate the famous Damascus steel, copper that is hard enough for edge tools, iron that will not rust, glass as iridescent and malleable as that of the ancients, enamel as beautiful as that of the Sarcophagi, glazes that equal those of old China, pigments with the brilliancy of those of Nero's time, and teachings as educative as those of Mark Hopkins on the log," Dr. Henderson says.

Ancient Process Slow.
"The fact is, however, that Damascus steel could not compare with the steel of our mills of today, for nothing superior to modern steel has ever been discovered. Not only that but the process by which steel is produced today is infinitely more swift."
The impression that the ancients were superior in the manufacture of iron and steel arose from the fact that London watchmakers at one time went to India for these metals. "Not, however, because, as is commonly thought, the English did not know the Hindu art," says the dean, "but because the Hindu art was so slow."

cause the kind of watchmakers needed could be obtained more cheaply in the Far East at that time."
"Copper hard enough for edge tools" which the ancients were supposed to have made was really tool-iron and not tool-copper, as some writers think. Iron tools have been found in the Egyptian pyramids, which proves that it had been used for this purpose as early as 2500 B. C.

Glass Today Superior
"The belief, too, that moderns cannot equal the glass of former times is not true. The glass used in the time of Christ was mostly opaque and pressed. The stories of malleable and iridescent glass adduced to the Romans are unfounded, because the glass produced today has been found to be far superior," Dr. Henderson declares.
"Likewise, this is true of Saracen enamel and Chinese glazes," says the dean, "and as for pigments, our color chemists have shades under control—something never conceived of during the time of the Saracens."
"One can safely state that there is not an art of the ancients that is not capable of duplication today, and not only can and do the people of modern times duplicate these arts, but they can and do enlarge their scope and better their products," declares the head of the College of Arts.

Junior—Will you share my lot?
"So—ed—What sort of house is of Hindu art?" says the dean, "but he—"

NOTICES

MUSIC

A series of lectures on "Sound and its relation to Music" will be given by Prof. I. E. Kelly, in the Physics Building from 11-12 a.m. on Saturdays for the next ten weeks.

ARTS '24 HOCKEY

Will the following players turn out on Saturday at 1 o'clock for a game with Dent:
Webster, Hampson, Bulfin, Layhew, Blumenstein, Duval, Sessenwein, Stone, Kelloway.

ARTS '26

Saturday will be the day on which to give orders for class pins.

JUNIOR HOCKEY

Will the following Juniors be at the Hollow Rink at 1 p.m.:
Abbott, Johnston, Roncarelli, Boos, Eide, McKies, Fry, Gordon, MacDonald and any other interested player.

CITY LEAGUE INDOOR BASEBALL

Will the following men please be at Bonaventure Station at 3.45 p.m. for the game against MacDonald:
Peacock, Talley, Nairn, Gaucher, Milne, Scott, Davis, Milligan, Eddy, and Dreger.
Bring white ducks. Those wishing to return early can do so arriving in town at 7.15 p.m.

AMERICANS' ATTENTION

Everybody out for smoker at Union, Lincoln's birthday, Feb. 12th at 8 p.m. Good speakers and eats. All out.

INTER B MEN

Be at Molson Hall for 8.00. Game vs. M.A.A.A. tonight (Saturday). Butler, Ferguson, Landy, Grassick, Tinkess, Bustin, Milne, Coltee.

FREE LECTURES

Professor Basil Williams will give a course of Public lectures on "Three Makers of the United States," Thursday, February 21st, Thursday, February 28th, and Thursday, March 6th at 5 p.m.

1—Alexander Hamilton, Maker of the Constitution, 5 p.m., February 21st, Royal Victoria College.
2—Andrew Jackson and the Irruption of the West, 5 p.m., February 28th, Royal Victoria College.
3—Abraham Lincoln, 5 p.m., March 6th, Royal Victoria College.
These lectures are free and no cards of admission are required.

Tickets for the Theological banquet may be purchased from members of the Theological Undergrad, executive and from the following:
Congregational College, C. H. Whitmore; Presbyterian College, Willis Glan; Diocesan College, Harry Andrews; Wesleyan College, L. S. Bartlett.

SCI. '24

There will be a hockey practice on the campus rink from 1-2 today.

R. V. C. HOCKEY

A practice game will be played on Saturday morning with the Physical Eds. It is very important that all the following be present: E. Hansen, C. Robertson, L. Bingham, E. Hutchinson, D. Hutchinson, F. Stocking, M. Burland, R. Farley. This practice will be held at 10 o'clock sharp. From 11-12 there will be a practice for all other players.

INTERMEDIATE HOCKEY PLAYERS

Practice against Juniors 1-2 p.m. in the Hollow Rink. Groups picture will be taken at 1 p.m. All out.

NOTICE

Intermediate A Basketball game with Argonauts scheduled for to-night postponed until Mon., Feb. 18th. Practice at 5.30 on Monday.

B. W. & F. CLUB

The following will be the order of the events for the Assault-Arms to-night which will begin at 8.00 p.m. sharp.

- (1) Fencing Crawford vs Silverstone.
- (2) 112 lb Wrestling Silver vs Helling.
- (3) 118 lb Boxing Brain vs Goldapple.
- (4) 126 lb Wrestling McEvey vs Greenburg.
- (5) 125 lb Boxing Howes vs Phelps.
- (6) 125 lb Boxing Baxter vs Adams.
- (7) 135 lb Boxing Green vs Snow.
- (8) 147 lb Wrestling MacNaughton vs Fisher.
- (9) 160 lb Wrestling Adams vs Briggs.
- (10) 147 lb Boxing Merritt vs Furness.
- (11) 160 lb Boxing Apter vs Marshall.
- (12) 118 lb Wrestling Wood vs Goldapple.
- (13) 175 lb Wrestling Freeman vs Demitrie.
- (14) Heavy Wrestling Rumble vs Copple.
- (15) 175 lb Boxing McLean vs Abinewit.
- (16) Heavy Boxing McLean vs Hart.

Contestants must be ready to go into ring before their bouts are called. All men must weigh in at Molson Hall between 1.00 and 2.00 p.m. today.

two pounds overweight being allowed. Please arrange to be on hand at both above times. The scales will not be brought down to the Union.

Several Eligibility forms, have not yet been received. They should be handed in when weighing in. Members of the B. W. & F. Club who are not competing in the meet and who will assist in running off the events, including Zavislsky, Krakowski, Brown, MacNaughton, Bernstein and Leland please see one of the managers at weighing in time today.

BASKETBALL

Sat. 9th, 1.30: Sci. I vs Pharm. I. Monday, 11th, 7.15: Arts II vs Dents. II.

Wed. 13th, 7.15: Winners play off for Freshman-Soph. Championship.

TRACK MEN ATTENTION

Any person wishing a picture of the McGill Track Club can obtain same by putting in his order at the Annual Board room of the second floor of the Union. The order may be put in any afternoon after 5 o'clock until Saturday Feb. 9th.

McGILL'S WHITE INDOOR BALL Will the following men be prepared to go to MacDonald College this afternoon to play MacDonald:
Peacock, Milne, Talley, Nairn, Gaucher, Dreger, Eddy, Scott, Davis, Milligan.

SCIENCE '27

Will the following men be on hand at one o'clock to-day for the basketball game against Pharmacy. Thomas, Clarke, Coyle, Callahan, Moffat, Frith.

M. I. T. SHOOT

The following are requested to shoot in the M. I. T. match to be held at the Montreal High School range this afternoon.

- 1.00-1.30 Hunter, Puddicombe, Morris, Shotwell.
- 1.30-2.00 Emmons, Wilson, Matheson, Mooney.
- 2.30-3.00 Delcatter, Williams, Nodder, Yexxa.
- 3.30-4.00 Manville, Hughston, Moore, Lyons, A. C.

If time permits there will be practice shooting after the match for others interested.

CHEMICAL INDUSTRY CLUB

The Chemical Industry Club will visit the Industrial Alcohol to-day. All those who are going will meet at the Union at 2.00 p.m.

MECHANICAL CLUB

A party will visit the Star Office, 165 St. James Street, to-day. The party will leave the Union at 2.00 p.m. sharp.

INTERFACULTY INDOOR BASEBALL

The Interfaculty Indoor Baseball tournament commences next Monday. It is urged that the managers of their respective faculties get busy and round up all men.

INTERMEDIATE B BASKETBALL Intermediate B Basketball game to-day February 9th, at Molson Hall, against M. A. A. A. at 8 p.m. Hall, against M. A. A. A. at 8 p.m.

MANDOLIN CLUB

All members who have signed the list for a copy of the club photograph will please make arrangements to receive and pay for photographs at next practice which will be at Peate's Studio, St. Catherine west, at 7.30 next Tuesday. The price of a photograph is \$2.80. All members of the club up to practice, and those who are to get photographs, don't forget. Attendance at practices has been irregular. Show a little more enthusiasm and come regularly to practices.

ARTS '23

All members of Arts '23 planning to attend Arts Dinner are asked to purchase their tickets immediately or signify their intention of attending banquet, to B. W. Willard, G. Van Vleet, or the Arts Junior, in order that arrangements may be made for a '23 table.

ARTS DINNER

Tickets for the Arts Dinner to be held in the Union on Monday, February 11, may be obtained from the following men:

- J. Sessenwein, '21; D. Everett, '26;
- G. Gorrie, '26; J. W. Morton, J. Duchworth, T. G. Henderson, C. Bourne, T. M. Gordon, '27; H. McPhail, Presbyterian College; A. R. Stone, Wesleyan; Y. Hatcher, Diocesan; E. B. Eddy, Congos; G. Van Vleet; E. W. Willard, or the Junior of the Arts Building.

UPPER CLASS BASKETBALL

Wed. Feb. 13th
Final
The winner of the Upper Class League will then play off with the Fresh-Soph champions. All men must be physically examined before playing.

SKI & SNOWSHOE CLUB

Badges of membership are now obtainable from members of the executive of the club. The different faculty representatives are:
Arts and Commerce, Geo. Grimson, Com. 124; Science, Art, Gray, 24; Medicine, Tom Brown and Bob Wade, Law, Hume, Anderson, 44.

CORRESPONDENCE

The Daily is not responsible for the sentiments of letters published in the correspondence columns. Signed communications from graduates, undergraduates and members of the faculty will be placed in print if they are not of too great length.

Correspondents are requested to observe the unwritten law of the news paper office—that they write upon ONE SIDE of the paper ONLY.

The Editor, McGill Daily.
Dear Sir,—In the "Daily" of February eighth I am quoted, in connection with the Law-Theology debate, as having said, "The will of God does not go far in settling a legal dispute—something better than that is needed."

In fact, I said "It is useless to ask what the revealed will of God is. Touching such things as joint stock companies, something better than that is needed." The blunder in the last sentence was promptly recognized by the audience, and after joining in the laugh on myself, I added, "Rather, something more definite is needed." What, at that time, was seen to be a slip of speech, doesn't look so well in print, especially when much distorted, and recorded without its context.

I hope I won't be thought a "sore-head," when I point out that misquotations of this sort, which can hardly be attributed to accident, may make amusing reading, but are bad reporting.

Also, in this case, it's rough on a hard shell Presbyterian!

Faithfully yours,

E. C. Common, Law '26.

CROWD ENJOYED MUSIC AT UNION

Jazz Tea Yesterday a Great Success

Of the many students who sought respite from their labors in the form of a quiet cup of tea, made more pleasant by music, all found themselves enveloped in a riot of music. One was wafted into the clouds by a dreamy waltz, or shaken like a pea on a drum by a lively fox-trot, by "Glen Adney" and his followers.

The Union Cafeteria was filled to overflowing and chairs were at a premium, many carrying their seats from across the hall in order to join their friends. Those unable to obtain a seat stood awaiting an opportunity to snatch a vacant place. After the music had started, many were the cups left untouched, the owners lost in admiration; at the close of each piece the applause was deafening. "Glen" was at the height of his form. "Horsie Keep Your Tail Up" was encored again and again. "Marchena," "A Kiss in the Dark" and others were received with no less enthusiasm by the tea-slippers.

Graduates expressed the opinion that the Union was gradually coming back to its pre-war status, through such affairs as these, and night luncheons. Yesterday afternoon's Jazz Tea was one of the most successful of the series of teas held this year.

Adney's Orchestra is composed of "Ray" Gerard at the "Sax," "Joe" Dougout, playing Bass Violin whilst Norman Fleury plays the concert violin. Howard Myness handles the traps while "Cliff" Menzies, a McGill man, plays the Banjo; last but not least is "Glen" Adney at the piano.

STUDENTS INVITED TO ATTEND LECTURE

On Monday February 11th, at 8.15 p.m., Dr. George Fluke will lecture on "Light and Electricity in Health and Disease" at Stevenson Hall, Drummond Street. It will be shown that the phenomena of light and electricity are due to vibrations set up in various ways, and that these vibrations are easily directed and adapted to the needs of the human system. The various effects of electrical currents on the muscle and on the body functions will be shown and demonstrated. The division of sunlight into infrared rays, visible rays and ultra-violet rays will also be demonstrated and the effects on the human body considered. Finally there will be a demonstration of the X-rays and many of the ways in which it is now being utilized will be considered. This meeting is under the direction of the Emmanuel Church Young People's Society and all students are cordially invited to attend.

PHARMACY SOCIETY

The Pharmaceutical Society invites Pharmacy students of all years to participate in the Annual Drive to take place Wed., Feb. 13 at 8.00 p.m. sharp. The tickets leave at 8.15 p.m. sharp from the New Medical Building. Tickets can be obtained from Class Representatives.

R. V. C. '26

With all those who wish class pins or rings please sign the list on the R. V. C. Notice Board. The design may be seen there and also the various prices. The list will be taken down to-day.

MEDICAL DINNER

The Medical dinner will be held at the Mount Royal Hotel on the night of February 14th. Tickets may be procured from class representatives.

R.V.C. WERE VICTORIOUS YESTERDAY

First and Second Teams Play Return Match

12-29 & 13-31

Games Were Played at Montreal High School Against Y.W.C.A.

Another double victory was added to the laurels gained by R. V. C. this year when both basketball teams succeeded in defeating the Y. W. C. A. teams last night in their return match, which was played off in the girls' gymnasium of the Montreal High School. The first team won with a score of 29-12, while that of the second team was 31-13.

This game was a great improvement on the one played against the Y. W. C. A. before the holidays. The play on the whole was much more accurate and fouling was not nearly so frequent, only three free shots being granted throughout the whole game. The Y. W. C. A. team displayed good combination, both centres playing a good game. Miss J. McCaw is especially worthy of mention, due to her successful shooting, particularly in the second period.

The R. V. C. team felt the loss of their forward, Miss E. Wardwell, who in the previous games of the season, was certainly to a great extent responsible for the repeated successes of the team. Miss P. Murray and Miss E. Russell, however, both members of the Senior Championship team, played an excellent combination game and their shooting was well-deserving of credit. Another great loss to the R. V. C. team in this game, was felt through the absence of Miss C. Fraser, jumping centre, who, during a practice earlier in the week, sprained her ankle, and was unable to play last night. Miss K. Rummels, regularly jumping centre on the second team, replaced Miss Fraser, and played a very good game.

First Team.

First period

Scarcely had the whistle blown at centre, when the ball was seen in the hands of the Y. W. C. A. Shot, but due to the excellent play of the R. V. C. defense no goal was scored and the ball soon travelled down to the Red and White goal. Here there was some rather poor passing from the centres to the forwards and the ball was secured by the Y. W. team who showed very good combination but failed to score. The ball had passed from goal to goal several times before the first score was made for R. V. C. by Miss P. Murray. Soon after this shot, the ball still remaining at the R. V. C. goal, Miss Russell of R. V. C. succeeded in neatly dropping through the ring a long shot from the field, making the score 4-0 in their favour. The play, at this stage, became very fast, but before Miss McCaw succeeded in scoring, Miss Russell had made two more baskets and the score stood 8-2 for R. V. C. Though the play now became somewhat rough, no fouls were made, and due to a good interception by Miss E. Dunton the ball returned to the R. V. C. goal and Miss P. Murray scored a basket. There followed much passing from goal to goal but no more shots were scored before the whistle blew for half time. Score 10-2.

Second period

Miss R. Dunton secured the ball at centre and immediately passed to Miss Murray, who scored for R. V. C. The ball again came to the R. V. C. goal and was netted by Miss Russell. Miss McCaw then scored for the Y. W., and Miss Russell again for R. V. C., bringing the score to 14-4 in their favour. For the next few minutes of play, the scoring was alternate, until the score stood 22-10. Miss Russell then scored on a free shot, and due to the very good combination play between Miss R. Dunton and the R. V. C. forward shots, the ball was kept at the R. V. C. goal for several seconds during which time two more goals were scored. Miss McCaw then scored the ball from centre and scored the last basket for her team. Just before the whistle blew for time Miss Russell raised the R. V. C. score by one more goal, thus ending the game with the score 29-13 for the R. V. C.

Miss Cartwright and Miss Haslam refereed the game. The line-up was as follows:—

R. V. C. A. Forwards
J. McCaw E. Russell
I. Abraham P. Murray
Centres
G. Donnelly K. Rummels
J. McRobie R. Dunton
Defence
C. Rorke E. Dunton
M. Pick J. Cameron
Subs—M. Pennington, E. Petrie, E. Baker.

Second Team

The R. V. C. second team defeated the Y. W. C. A. second team in a fairly tight game. The ball was taken down to the Y. W. C. A. goal immediately after the toss-up but owing to the good interception on the part of M. McWaters, the Y. W. failed to score. L. Chalk scored the first

TRANS-ATLANTIC WIRELESS PLANT

Electricals Learn Construction of Glace Bay Station

The Electrical Club met last evening at five with President Wood in the chair. An interesting paper—"The Main Components of the Equipment of a large Wireless Station," was read by S. M. Finlayson of Science '24.

With the aid of diagrams he gave a description of the layout of the plant at Glace Bay. This station operates in connection with one in Ireland.

The aerials used are of mammoth proportions and are supported by "tube" style towers, similar to the masts on the American men of war, and are 200 and 600 feet in height. He showed pictures of the tower assemblies and the completed structures. Pictures of all departments were shown, including those of the power plant which operates a 5000-volt direct current generator.

The "valves" are very different from their cousins the "peanut tubes" and are about six inches in diameter. Each requires power equal to 2-1/2 H. P. to operate.

The station is so laid out that the operator can see all the apparatus from his desk. The operator is not one in the ordinary sense of the word. He does not actual transmitting but simply looks after the transmitting machinery and keeps it working satisfactorily. The real transmitting is done from the receiving station twenty-five miles away and the message is transmitted to the sending station by telegraph and is automatically broadcasted. The two stations are widely separated as the receiving station would interfere with the work of the broadcasting station and thus spoil the results.

Pictures of two kinds of "tape" were shown. The sending tape is "punched" on a machine similar to a typewriter and is then fed into the transmitting machine. The receiving tape receives the message in the form of a wavy line the waves standing for dots and dashes. The time for discussion was short but several points regarding tower erection, and transformation were dealt with.

The next activity of the club is expected to be in the nature of a luncheon at which a prominent engineer of the city will speak.

ARRANGEMENTS FOR MUSKOKA CONFERENCE

Today's committee appointed from the Ontario and Quebec branches of S.C.A. council is meeting at McGill. The purpose of this committee is to make preliminary arrangements for the Muskoka Conference for next fall. The committee comprises the following delegates from the four central universities.

Ernest Clark, General Secretary of the Canadian Students' Christian Association.

Helen Nichol, University of Toronto.
Don Taylor, Queen's University.
G. Griffiths, Western University.
Harry Avison, McGill University.

"THE MEAN THING"

There was a sweet young lady,
Who owned a motor car;
She drove it fast, she drove it slow,
She drove it near and far.
One day she drove it on a track,
The train came with a roar;
There was a sweet young lady, but
There isn't any more.

goal for R. V. C. on a pass from L. Robertson, centre; a few minutes later P. Perry scored for R. V. C. and shortly afterwards this was followed by two shots for R. V. C. by L. Chalk. The ball was then taken to the other end and M. Shearer scored the first goal for the Y. W. C. A. Towards the close of the first period the play was continually at the R. V. C. end with P. Perry and L. Chalk scoring heavily. The Y. W. scored twice on

EXCITING BOUTS PROMISED WHEN B.W. & F. FINALS ARE STAGED IN UNION TONIGHT

Sixteen Events Scheduled—Seven Boxing and Eight Wrestling Bouts—Fencing Duel Between Crestohl and Silverstone—Goldapple in Two Battles—Last Year's Champions in Action—Many Promising Newcomers Among Entries—Winners To-night Will be Team for Assault-at-Arms

Tonight in the Union Ball Room, the boxers, wrestlers and fencers will participate in the finals of the Annual Inter-Faculty Competition. In all, there will be sixteen bouts staged. The fireworks will be opened by a fencing duel; the boxers will stage seven bouts and there will be eight wrestling competitions. The winners of these bouts will be declared champions of McGill in their respective classes, and they will form the team on which the Red and White hopes are centred in the Annual Assault-at-Arms with Queen's and Varsity which takes place here on Feb. 15 and 16.

Some of the participants in tonight's fray are champions of McGill last year and they will be giving the best that is in them to retain their crowns. A number of the latter are men who formed the Red and White team which won the Assault-at-Arms at Kingston last year. The other contenders, many of whom have joined the Club this year have shown promising results and tonight's entertainment ought to be a lively one.

In the first number of the program, Crestohl, champion fencer of McGill, will meet Silverstone, who is also a veteran in the many sport of swordsmanship. These two men have met often in the past, are old and friendly rivals, and should provide some nice entertainment for the spectators.

A boxing bout in which Brain and Goldapple will cross mitts, will follow the fencing tournament. These men are in the 115 lb. class and in all probability a lightning exhibition will be given. These two men met in the semi-finals and although Brain received the decision after an extra round of fighting, there was little to choose between them. Tonight's battle, therefore, should prove an interesting one to watch.

The midges among the wrestlers Silver and Heilig of the 112 lb. class, will grapple in the third bout. The 126 lb. wrestling fixture will bring together McEvoy and Greenberg for the fourth bout of the programme.

The 135 lb. wrestling bout will see in action Howes, last year's McGill champion, and Phelps, who holds the Provincial championship in this class. This bout should be of unusual interest because of the reputation these men have made and of their veteran knowledge of wrestling.

The programme will then revert to a boxing display when Adams and Baxter of the 126 lb. class shake hands in the ring. This will be followed by the 135 lb. competition when Green comes up against Snow, who won the Intercollegiate championship so gamely last year. Doubtless there will be plenty of thrills in these two bouts because the fighters are equally fast and are heavier hitters than their lighter companions of the Boxing Club.

Wrestling will again hold the stage, the following bout being between McNaughton and Fisher, 147 lb. grapplers. McNaughton is last year's champion of McGill in this class, but he will have to go the limit to pin Fisher's shoulders to the mat, as the latter is himself a grappler of no mean ability.

Adams and Briggs are catch-as-catch-can opponents in the ninth fixture of the evening. This is not, however, the same Adams who is entered in the 126 lb. boxing event as one might think.

The tenth bout will see the boxers again in action, Furness taking on Merritt in the 147 lb. class. Merritt won the Intercollegiate championship when he took the decision from Hall of Queen's last year. The 160 lb. event in the many art will bring together Apter and Marshall. Neither of these

has been seen in action as yet and as a result unusual interest is centred on their bout.

The wrestlers will come before the onlookers when the versatile Goldapple is also entered in the 115 lb. class boxing and is as good a boxer as a wrestler. Wood, therefore, although he will be fresh for his bout, will have to go the limit to win. It is a big jump from the 118 lb. class to the 115 lb. class but this will be order of the things tonight. Demetre, a newcomer to the Club, who has shown some nice work this year, will take on Freedman, the Intercollegiate champion. Freedman also defeated the Dominion champion in the Assault at Arms last year. However, in Demetre, he has a sturdy opponent so the bout should be a very good one. The heavyweight grappling contest will see Rumpel and Capple in action for the fourteenth fixture of the evening. The first named, Rumpel, is a very finished wrestler and won the Intercollegiate championship easily last year.

The boxers will again be in the limelight when McLeod and Abinovitch meet in the 175 lb. bout. Abinovitch is a boxer with a good deal of experience and while McLeod is not so fortunate in this respect he is a sturdy fighter who will put up a good fight. Probably the most interesting bout of the evening will be the sixteenth and last when the heavyweights step in the ring. It is remarked that the heavyweight bout is always the most interesting to the spectator, probably because of the fact that in this fight heavier blows are exchanged than in any of the others. The opposing mitt artists are McLean and Hart who are both renowned as heavy hitters. McLean has four year's experience to back him up but although Hart is a newcomer to the Club, it will be a fight to a finish.

All in all, the programme of sixteen varied events should prove to be an evening of exciting entertainment. The contestants are men who have shown their calibre in last year's competitions and men who fought their way into the finals by their aggressiveness and ability. The B. W. & F. Club this year has had a large and enthusiastic following, and has very good chances of retaining the honors won at Kingston last year. Tonight's entertainment is scheduled to start at eight o'clock sharp, and judging from the quality of the performers a record crowd will be out to witness the bouts.

The evening's programme is comprised of the following events:

1. Fencing—Crestohl vs. Silverstone.
2. 115 lb. Boxing—Brain vs. Goldapple.
3. 112 lb. Wrestling—Silver vs. Heilig.
4. 126 lb. Wrestling—McEvoy vs. Greenberg.
5. 126 lb. Wrestling—Howes vs. Phelps.
6. 126 lb. Boxing—Baxter vs. Adams.
7. 126 lb. Boxing—Green vs. Snow.
8. 147 lb. Wrestling—MacNaughton vs. Fisher.
9. 160 lb. Wrestling—Adams vs. Briggs.
10. 147 lb. Boxing—Merritt vs. Furness.
11. 160 lb. Boxing—Apter vs. Marshall.
12. 118 lb. Wrestling—Wood vs. Goldapple.
13. 175 lb. Wrestling—Freedman vs. Demetre.
14. Heavyweight Wrestling—Rumpel vs. Capple.
15. 175 lb. Boxing—McLeod vs. Abinovitch.
16. Heavyweight Boxing—McLean vs. Hart.

AMERICAN HISTORY TO BE DISCUSSED

Professor Basil Williams Will Give Three Lectures

Starting next Thursday and continuing for two Thursdays thereafter, a series of lectures will be given by Professor Basil Williams on "Three Makers of the United States." These will take place at five o'clock in the auditorium of the Royal Victoria College, and will be open to the public, no charge for admission being made.

Professor Williams is King's Professor of History at McGill, and is Honorary President of the McGill Historical Club. He is well-known as an authority on American history, and these extension lectures which he is giving should prove of great interest. Especially appropriate are they at this time, when Canada is talking of broadening her foreign policy, and when there is a possibility of different relations being entered into with the people to the south of the invisible boundary.

The first lecture, on February 21st,

will be on "Alexander Hamilton," the "Maker of the American Constitution." The second, on February 28th, will deal with "Andrew Jackson and the Disruption of the West." The final lecture of the series, on March 6th, will be on "Abraham Lincoln," the great president of the United States.

THE TECHNIQUE of the telephone service and the psychology involved is not at all understood by the small town switchboard operators. Some girls actually have heard of the expression "number please?" But merely ask, "what number do you want?" or just "number?" And this poor service is due to the lack of knowledge, says Miss Pearl Thompson, state investigator, rather than to wilful inefficiency. The Twin Cities, although falling under the classification of small towns, are free from the sort of service mentioned. That is probably because of the courteous conversation of both operator and speaker, as well as the automatic system that Urbana is proud of. As long as there are human beings with human tendencies there will be a lack of knowledge and wilful inefficiency. Moral: Install the automatic system.

COACH VERNOT AND MERMEN REGAIN TITLE

(Continued from page 1)
showed that he has excellent possibilities of becoming a winner in this class.

Bourne, of McGill, raced away from Uren, of Toronto, in the fifty yards free style, showing that his achievements in the best have a very sound basis. This young swimmer is among the best and should be a great help to McGill during the next few years. Clarholm placed third but Keefler failed to make points.

George Vernot was seen in a new light when he won the 200 yds. breast stroke by the comfortable margin of twenty feet, at the same time lowering the former record by two seconds. This was one of the events won by Toronto last year but this time McGill tallied eight points, for Findlay outclassed the Varsity men and came second. Hill placed third for the Blue and White.

The visitors again showed undisputed superiority in the back stroke, Wood and Latchford taking first and second places, although they failed to dislodge H. Fisk's time. Bethel, for McGill, made a game showing but was not in the same class.

The Long Plunge
George Vernot's record for the 100 yds. free style went into disarray when his mate, Bourne, placed first with the time of 59 secs. Jim Ross made second with Aren third and Keefler trailing.

Last year Waldron of Toronto plunged 75 feet 6 inches and McGill did not make a point. A different story was told last night for Vernot made 71 feet, 6 1/2 inches and it looks as if he might better the Toronto man's distance before he leaves college. Clarholm and Davis had a great struggle for secondary honours but the McGill man took them by plunging one-half inch further, which is close work. Shottred did not place.

In the last event, the 200 yds. free style, Captain Vernot repeated the win of last year though Vennels was at his heels at the end of the eighth length. The finish was closer than many expected. Latchford and Ross struggled for third ranking but the McGill man waited too long before putting on his final burst of speed and failed to make points.

There were two special attractions, a medley relay race and a Chinese lantern race. Both were amusing for the spectators and caused abundance of laughter and jocular comment.

The scoring was: first place, 5 points; second, 3 points; third, 1 point. The relay counted four points for the winner, giving nothing to the losers.

Officials and Summary.
The official for the evening were: Referee Mr. C. Goulden; Announcer M. Gaboury; Starter Mr. G. Moore; Chief Timer Professor A. Kelly; Timers Mr. F. Stackpool; Mr. A. T. Thibodeau; Mr. M. Veary; Judges Swimming Dr. A. S. Lamb; Dr. C. J. Sullivan; Mr. R. Cumine; Judges Diving Mr. C. Goulden; Mr. L. G. Norris; Mr. W. Gathercole; Scorers Mr. A. W. Ross Mr. A. Farmer.

The summary is as follows:
Relay race: McGill (Bourne, Clarholm, Ross, Vernot.) Time—1 min. 44 1/5 secs. New Canadian and new Intercollegiate record.

Fancy diving: Wood (T), Van Valkenburg (T), Clarholm (M). The points were 81.96, 80, and 74.56 respectively. 50 yds. free style—Bourne (M), Uren (T), Clarholm (M). Time—25 4/5 secs.

100 yds. breast stroke—Vernot (M), Findlay (M), Hill (T). Time—1 min. 21 secs. New record.

50 yds. back stroke—Wood (T), Latchford (T), Bethel (M). Time—34 1/5 secs.

100 yds. free style—Bourne (M), Ross (M), Uren (T). Time—59 secs. New record.

Long plunge—Vernot (M), 71 ft. 6 1/2 in.; Clarholm (M), 61 ft. 8 in.; Davis (T), 61 ft. 7 1/2 in. 200 yds. free style—Vernot (M), Vennels (T), Latchford (T). Time—2 min. 20 1/5 secs.

WOODROW WILSON—NATIONAL LEADER

By Prof. J. M. Mathews

One of the nation's great men and one of the leading figures of his time on the political stage of the world are expressions which the illness of Woodrow Wilson naturally brings to the lips of millions of people. In the minds of those who had the pleasure and the good fortune to know him personally, he is also reckoned as a quick wit, a brilliant speaker, and a courteous and scholarly gentleman. When the writer first came to know him, the idea for which he was striving was summed up in the slogan, "Princeton in the service of the nation." When he was finally called to the Presidency during the greatest crisis in our national history, it was natural that he should virtually have adopted as his motto: "America in the service of humanity."

When he became president of Princeton university, that institution was known as a pleasant country club for rich men's sons. His aims were to introduce a more democratic spirit among the students and to improve the educational system through the adoption of the preceptorial plan of instruction. His attachment to principle at whatever cost was shown by his refusal to receive a large donation to the university on the ground that the conditions attached to the gift would work harm to the institution. His policies made many enemies for him among alumni and faculty.

GLADSTONE BEATS BASKETBALL TEAM

Red and White Squad Defeated in Close Game

Ottawa Ont., Feb. 8.—The Gladstone, leaders in the Ottawa City Basketball League defeated the McGill team here last night by a score of 36 to 27. The game, which was played in the Y. M. C. A. gymnasium was the fastest and most spectacular of the local season and a crowd of about 300 witnessed it, this being the largest gallery of the season.

The clever team-work and clean play of both teams made the game a very enjoyable one. McGill led comfortably until well on in the second half when the Gladstone's started a furious attack breaking through for basket after basket, scoring no less than 16 points in the closing ten minutes of the match.

Manson, the big McGill centre man, was the outstanding player in the game, with the locals starring Geo. Barnett, their diminutive captain, a boy of 18 years of age and weighing less than 130 pounds. He scored 6 field baskets and 5 free throws for a total of 17 points. Quackenbush with Brown also showed well for McGill with Connell and Saller playing great games on the defense for the winners.

Basketball will receive a great boost in Ottawa by the visit of the McGill team. Their clean play and sportsmanship throughout their clever passing and perfect defense formed a combination which tickled the fans. It is hoped that the McGill team can be secured to play another exhibition in the capital, for a win over a team of the calibre of McGill is a triumph and the locals would be satisfied to lose to the cleverest team which has appeared in Ottawa for many moons.

FREE LECTURES ON "SOUND" START TODAY

The first of a series of lectures on "Sound and its Relation to Music" will be given this morning from 11 to 12 o'clock in the Macdonald Physics Building. Prof. Herschell E. Reilly of the Physics Department is giving this course of lectures. All who have heard Professor Reilly lecture know that he is interesting and, at the same time, concise and definite. There will be one of these lectures every Saturday for the next ten weeks from 11 to 12 o'clock. The course is designed for the students of the Conservatorium of Music, and other students who are interested in the scientific basis of the theory of music.

First year students taking Physics, however, should find these lectures of great assistance in this work. The principles of the production of sounds by musical instruments, including the voice, the various vowel characteristics, tone quality, and the difficulties in translating operas, are a few of the topics to be discussed in these lectures. There will be various experiments to illustrate each lecture. There will be no admission fee.

Father—Your conversation is exactly like the musical scale.

Debutante Daughter—Musical scale, father?

Father—Yes! You start with dough and you finish with dough!

—Virginia Steele.

She—Say, Albert, that Miss Byrthe is pretty fast isn't she?

He—"Pll say she is. She told me that she has covered five laps already this evening.

iv. In the midst of the ensuing fight, the writer had a talk with him in the spring of 1910. He had just returned from a trip to Bermuda, where he had been taking mud baths for his health. Referring to the attacks being made on him, he laughed them off in his characteristic fashion, saying that the plentiful supply of mud being slung at him would enable him to continue his baths at home.

As governor of New Jersey, Wilson was largely instrumental in bringing about reforms which have left a permanent impress upon the political institutions of the state. The reputation which he acquired in this position caused him to be regarded by the more progressive element among the Democrats as the logical standard-bearer of his party in the campaign of 1912.

His first election was made possible by a split among the Republicans, but he was re-elected in 1916 on the strength of his record and against an opposition very largely reunited. His aims and policies during the World War were too well known to need recounting here. Few will deny that he made some serious mistakes during his second administration, among the most regrettable of which was that, with a stubbornness equalling that of the irreconcilable senators, he refused to make any concession or compromise on the League of Nations issue. Nevertheless, his lofty aspirations and eloquent expressions of high idealism greatly heartened the forces of the United States and those of the governments with which we were associated in winning the war, and his name will undoubtedly go down in history as the dominating figure on the political side of that heroic struggle.

MCGILL OUT TO WIN POLO CHAMPIONSHIP

Red and White Mermen to Meet Varsity Tonight

K. OF C. TANK

Four of Last Year's Men on McGill Squad

The first of the home and home games in water polo, between McGill and Varsity, is scheduled for tonight, the K. of C. tank and should be a fine exhibition from start to finish. The McGill mermen have been practising hard since Christmas and are in first class condition. The team, which won the Dominion championship, before Christmas is still intact and there certainly seems to be every possibility of them registering a victory tonight against Varsity.

Last year the first game was played in Toronto, the Blue and Whites downing their opponents by a score of 4-1. However, when the second game was played in the Y.M.C.A. here, McGill did what seemed impossible, when they whitewashed the Toronto swimmers 6-0, thereby winning the intercollegiate championship.

The personnel of the Red and White differs slightly from that of last year. The squad has lost the services of Graham-Browne who turned in a stellar performance in the nets last year. Laddley, a defense man has also left college. Jardine who has been playing goal through this season for the senior team has shown great promise and can be depended on to play a cool game at all times. Forsythe, too, has been playing well on the defense in place of Laddley. Of the last year's men who are still on the team, George Vernot is outstanding. Last year he was largely responsible for McGill's victory and with his speed and weight is a hard nut to mark.

Ross and Kyle are on the forward line again this year and have been playing excellent polo up to date. Pop Anson is still on the defense and the forward who can pass him needs to be well above the average. McGill has the advantage in its game of playing in their own tank and expect to make the most of it. The Varsity swimmers however, have been practising since they arrived so they will not be entirely strange to the tank.

The strength of the Blue and White team is unknown as yet but the Toronto men are sure to put up a hard fight and they have high hopes of beating the Red and White mermen.

The game should certainly be well worth while seeing.

The line-ups of the teams are as follows:

INTERMEDIATES PLAY BASKETBALL TO-NIGHT

Tonight at 8 p.m. the Montreal Amateur Athletic Association Intermediate basketball team will clash with the McGill Intermediates, "I" section, in Molson's Hall. These teams have already played one close game this season on the M.A.A.A. floor, and at that time the Montrealers won. The McGill aggregation is looking for a turning of the table tonight when they play on their home floor.

Parko is a veteran on the M.A.A.A. team and will be worth watching. Austin and Coteau are new faces on the McGill line-up and have been recently selected from among the promising men who have been turning out for practice.

The line-ups are as follows:

MCGILL	M.A.A.A.
Forwards	
Tinkess	Parko
Sandry	MacKenzie
Centre	
Miller	Hartney
Guards	
Ferguson	Bunker
Granik	Smallie
Subs	
Millie	Kearns
Austin	Coteau

FEDERATION ISSUES SECOND CHRONICLE

All those who are interested in the work of the Canadian Federation of University Women will be pleased to know that the Second triennial Chronicle of the Federation is now on sale. This publication appears as a postscript of the second triennial meeting held at Minaki, Ontario, during the last three days of August, 1923, and contains reports of the Educational Committee, the Committee of Libraries, and of the International Federation of University Women with which the Canadian Federation is incorporated, as well as an account of the Scholarships offered by the Federation.

Hey—"My boarding-house keeper says I'm the idol of her heart."
Day—"Well, isn't that nice?"
Hey—"Not when she lays burnt offerings before me at meal time."

good in our own line

Mr. Church, the minister, called in Dr. Dope to treat his wife. When Mrs. Church recovered, Mr. Church asked for his bill, but Dr. Dope did not wish to charge his pastor anything, and so replied:

"I'll tell you what we'll do. We are supposed to be good in our own line. Now I will keep Mrs. Church out of heaven just as long as I can if you will keep me out of hell as long as you can."

The man whose study is atoms and ions, who understands differential calculus or knows the difference between Milton and Mah Jong, cannot be expected to be acquainted with the details of food preparation. We are each supposed to be good in our own line.

Now I don't know a molecule from a merry-go-round, and Cicero to me is only the name of a horse. But I do know food and my specialty is the

UNION CAFETERIA

I am prepared to see that your food is wholesome well cooked and correctly served, and I know that I can save you money on your board bill. In fact I will keep you out of heaven just as long as I can.

And, by your patronage, you will go a long way towards keeping me out of hell as long as possible.

Pierre

GREAT DINNER PLANNED BY MEDICAL MEN

Dr. G. E. Vincent Will be the Guest of Honour on February 16th.

ANNUAL EVENT All Possible Facilities Installed for Convenience of Diners

Dr. G. E. Vincent, President of the Rockefeller Foundation, will be the guest-of-honour and chief speaker at the annual banquet of the Medical Undergraduate Society to be held in the Salle Doree of the Mount Royal Hotel on Saturday, Feb. 16 at 7 p.m. Sir Arthur Currie, Dean Martin, Prof. A. B. McCallum and several other prominent University officials have signified their intention of being present as guests of the students. Graduates of the Faculty of Medicine are taking great interest in the coming function, and it is likely that the numbers of the undergraduates and graduates at the gathering will be about equal.

There are several speakers of note whose names appear on the toast-list so that the embryo doctors will hear a brand of oratory that will cause this night to be long-remembered as one bright spot in their college career. A novelty which should cause a wealth of mirth, will be that on the introduction of each speaker, a caricature of him will be flashed on a screen, at the same time Moore Kelly's orchestra will sing an appropriate verse or two.

Every diner will be able to choose his own seat, as a table-plan is now at the hall-porter's office in the New Medical Building where parties can reserve their seats. There are a few tickets still available, and these may be obtained from the following: Ted Alward, Sandy McIntosh, Al. Skelly and J. C. Simpson, all of the final year; Joe Senecal, fifth year (six-year course); Bowman, fourth year; Baill, third year; Olmstead, second year; and Paul Melanson, first year. The full programme of the evening will be published in the Daily about the middle of next week.

ENGLISH CHAPLAIN WILL VISIT MCGILL

Rev. Studdert Kennedy to Address Theologs

Rev. Studdert Kennedy the English chaplain so popular at the Front during the recent world war will spend a few days in Montreal during February and will be heard at least twice at McGill during his brief stay in the city. "Woodbine Willie" as he has been nicknamed, has earned a great reputation in Canada and the United States through his writings and also through his lectures. For the past few months he has been giving a special course of lectures at American Theological Colleges. At the student Volunteer Convention held at Indianapolis at Christmas he won the hearts of the six thousand students present. Mr. Kennedy gave one of the opening addresses at the Convention and then returned to his college. After proceeding for nearly a day's journey he received a wire from the chairman of the convention urging him to return to Indianapolis to close the Convention. This is but one of the many expressions of the popularity which Father Kennedy enjoys.

He will speak before the Theological Undergraduate Society on the morning of Wednesday February 20th for the benefit of the students of the Diocesan, Presbyterian, Wesleyan and Congregational Colleges, and others.

COM. '24 WIN HARD GAME FROM MED. '24

Meds. Rallied in Final Moments and Result Was Close Score

"An energetic game with an exciting finish" describes the Meds. '24-Commerce '24 basketball game at 6:30 yesterday. The Medicals lined up with one man short, and although they played very cleverly at times, they were at a great disadvantage. As the game started late, the time for each half was shortened to ten minutes.

In the first half, Commerce gradually piled up a score of 7 to Meds. 1. Both teams had a strong defence. Early in the second period Commerce put in another basket but after five minutes of play Medicals made a quick rally, outplaying their opponents and scoring three baskets. With ten seconds to go, they dashed down in an attempt to tie the score, but this time the blow, and Commerce were the winners by the score of 9-7. The ups were as follows:

Meds. '24-Clelland, Bustin, Caldwell, Rankin.
Comm. '24-Gilpin, Leck, Armitage, Davis, Bryce, Annable.

DR. G. E. VINCENT TO SPEAK HERE

Also Principal Speaker at Hamilton Next Week

Dr. George Vincent, who is among the many prominent speakers at the Medical Dinner next week, is to be the guest of the McGill Alumni of Hamilton at their annual banquet on Feb. 11th. Among the speakers at this dinner is Prof. Stephen Leacock.

Dr. Vincent is the president of the Rockefeller Foundation of New York. He has few peers in America as a brilliant educationalist, university president and well known writer on sociological subjects.

Dr. Vincent, who will address the gathering stands at the height of a brilliant career. He was born in Rockford, Illinois, March 21st, 1864, graduated in Arts from Yale in 1885; is Ph.D. from University of Chicago, in 1896, and LL.D. of Chicago and Yale universities in 1911; dean of the faculty of Arts, literature and science, University of Chicago, 1907-1911; president of the University of Minnesota, 1911-1917; president of the Rockefeller Foundation, New York, since May 15, 1917.

Concerning the Rockefeller Foundation, with which institution Dr. Vincent is connected, a little information is timely.

The Rockefeller Foundation was incorporated May 14, 1913, under a special charter granted by the state of New York, and with an initial endowment of \$100,000,000, the gift of John D. Rockefeller. Administration was entrusted to an original board of nine members, who were given power to add to their number and to choose their successors. The Rockefeller sanitary commission, in existence since 1910, was reorganized as the international health board, and became part of the Rockefeller Foundation. In 1914 the China Medical Board was created, and the rapidly-developing work of the Foundation in aiding medical schools in many countries led in 1915 to the setting up of a division of medical education.

He-"How do you like Shakespeare?"

She-"Oh, all right, but he seems to use such dreadfully worn-out phrases-as 'all the world's a stage,' and 'Alas, poor Yorick!'"

-Chaparral.

Aunt Clara: Why, Nellie, what's the matter? You look worried.

Nellie: Oh, auntie, I don't know what to do. Jack says he'll take to drink if I don't marry him, and Tom says he'll stop drinking if I become his wife.-Ex

TWO RARE WORKS LATEST ADDITION

Library Receives Valuable Books on Bird Life

Two rare works have been acquired for the Emma Shearer Wood Library for the Emma Shearer Wood Library cording to a letter received yesterday by Dr. G. R. Lomer, of the Redpath Library.

The first, "La Monographie des Placides," etc. by Malherbe, is a set of four richly ornamented volumes in which there are 123 full-page plates, and about 650 hand-coloured figures. This is a valuable addition to the Library, as the book was printed in Metz in 1861-62, the edition being limited to one hundred copies. The second, "Abbildungen zur naturgeschichte der Vogel" by Malchou, was published in New York in 1861. It includes 433 drawings of birds delicately and beautifully executed on 173 plates, the colouring being most effectively done in water-colours.

Typewritten copies of two very uncommon ornithological works have also been recently added to the Library. One is a rare partial catalogue of the birds of New York state, especially of Long Island. This volume, published in New York by S. Mitchell in 1865, is the earliest list of the birds of both Long Island and New York State.

The second copy was that of a suppressed Introduction to "Mammalia and Ornithology," the history of the United States Exploring Expedition, under the Command of Charles Wilkes, U. S. N., which was published in 1848. The cause of the suppression of this introduction is unknown, but the probable reason was hostility between the scientists of the expedition and the officials at Washington. As the party was sent out by one Government and returned when its opponents were in power. In any case, there are only six originals of this deleted portion in existence, and the only one publicly sold fetched about \$450. These typed copies were presented by Dr. Charles W. Richmond of Washington.

Dr. Casey Wood, in a recent letter says that he will probably visit Montreal in the middle of May. With this note came a contribution to the Wood Library of ornithology of \$250. Efforts are being made to induce Dr. Wood to lecture on his experiences in the Southern Pacific, when he reaches McGill in the spring.

Meds. '25 defaulted their game with Science '25 which was due to start at 7:15.

EXCELLENT REPAST ASSURED ARTS MEN

Arrangements Completed for Dinner Monday Night

When the prospective diners assemble at the Union Monday night, on the occasion of the Annual Arts Dinner, they will find an array of talented speakers at the head table including Dr. Laing of Chicago, undergraduate representatives from Queen's and Toronto Universities, and prominent members of the Arts Faculty of McGill. Besides these, the number of undergraduates, postgraduates and alumni who have already secured tickets for the function assures a seating list at the festive board greater than that of former years.

The Dinner Committee anticipates a few late applications for tickets. These will be provided for as far as possible, but in order that the very best provision may be made for all the banqueters, Mr. Honneger, manager of the Cafeteria, must know definitely today how many will attend the dinner. The Committee has made arrangements to set a small number of extra places for those who make a last-minute decision to join their fellow Arts students at the Union.

The dinner table set in the ballroom, is being suitably decorated in red and white. Special artistic features are being developed which will lend a pleasing appearance to the sombre hall and correspond to the spirit of gaiety that will reign.

The dinner itself, judging from the formidable array of courses on the menu and the past efficiency of Mr. Honneger in catering, cannot fail to satisfy the most aristocratic taste and will be a new and pleasant experience for those whose schedule often necessitates a hasty meal.

PSYCHOLOGY SUBJECT OF DISCUSSION

(Continued from page 1)

The mistake lies in the belief that man is a purely economic man. This is psychology so simplified as to be grossly misleading. One must think in terms of more adequate psychology than of man as a rational machine. The great events of the last decade could never have been foretold on economic lines. In spite of this however many leaders have the false idea that the unraveling of economic tangles will terminate all strife.

From this Dr. McDougall passed on to another party of thinkers, whose predictions he said are equally well reasoned, equally rational and equally futile.

By these he meant the idealists. As an example of idealistic prophesy he read a passage in which a writer made a strong plea for "the regeneration of the human heart." After this he gave an analogous platitude bringing in a laughable theory of idealistic plant life. The only difference, he said in comparing the two, is that one ignores the nature of man, while the other ignores the nature of plants. Such idealism, he continued, is too obviously remote from reality to be of influence in international affairs.

The present sufferings in Europe are due in some measure to a group of idealists, one of whom is Ramsay MacDonald, present premier of Great Britain.

In dealing with the question of the French attitude toward Germany since the war, Professor McDougall pointed out that a psychological view of the matter had not been taken by other nations. Proposals and suggestions had been made, books had been written, but without taking account of the psychological facts. In studying the question two facts should be borne in mind, first that the French fear oppression by Germany, and second that no solution has yet been offered that will allay her fears of being destroyed in the future. These are often ignored especially by those who have been denouncing the French policy of late years.

If the question be considered carefully it will be seen that no other policy was open to the French statesmen. It was the only policy that would provide a future guarantee of safety for France. Economic ascendancy on the part of Germany would mean military ascendancy, to combat which France would have to impose heavy taxes to increase her army, crippling the country and resulting in her sinking to a second or third rate power. The French are not naturally militaristic-they are forced to be so. The cure for this state of affairs must come from an assurance of safety. A recognition of this is fundamental. As to whether France would have profited if she had pursued an opposite policy it is purely a matter of opinion. As it was she chose her policy and acted vigorously. Germany resisted and suffered.

At any rate one had now to deal with the future. If Germany were restored she would crush France tomorrow; and until she is assured of adequate protection against this the heart of France will never change. The French are a sensible people, and one must not reproach them for harbouring revengeful feelings. It is the natural and inevitable outcome of the sufferings inflicted upon them. Hatred is a state of mind involving anger and fear. The French anger has

MCGILL WHITES TO PLAY McDONALD

Second Game of City League Indoor Baseball at St. Annes Today

The second game of indoor baseball in the City League is scheduled for this afternoon when the McGill Whites will make the trip to St. Annes. The game last night was won in handy fashion by the McGill Reds from University of Montreal and it is to be hoped that the Whites will do as well.

The McGill men have been handicapped by lack of practice as they have had very few work-outs as yet. However, most of the men have been playing in the inter-class series and are sure to give a good account of themselves. The strength of the MacDonald team is yet unknown. They have had the advantage of practice but it remains to be seen how much it will benefit them.

Of the men who are to make the trip, Peacock is the outstanding player. He played last year on the McGill team and can be depended upon to put up a good game. The other men for the most part, are newcomers, but from the form they have shown in practice there seems to be a good chance of their winning.

The following are to make up the team: Peacock, Milne, Tuttle, Nairn, Aucher, Dreger, Eddy, Scott, Davis, Gillan.

R.V.C. WILL HELP IN THEATRE NIGHT

Representatives for Committee Elected Yesterday

The R. V. C. Undergraduate Society met yesterday to discuss for the first time the McGill Theatre Night. A letter from the McGill Theatre Night Committee was read requesting that a representative be chosen from R. V. C. Owing to the coming Gym Demonstration which is to take place on the evenings of March 21st and 22nd, and other activities which will demand much time and attention, there was some doubt as to whether or not the R. V. C. should undertake a performance for Theatre Night as well. After some discussion it was finally decided that in the event of the authorities granting permission for a Theatre Night to be held this year, the R. V. C. as a part of McGill would co-operate and take part in the performance. At the same time it was placed on record that the R. V. C. Undergraduate Society, as a body is not in favor of Theatre Night being held annually.

Miss Massey-Bayly was then elected representative for the Theatre Night Committee which is to meet on Monday for the first time. At a later date a producer and committee will be elected by the R. V. C.

At the beginning of the meeting the secretary read a letter from the women's debating society of Toronto University proposing that an inter-collegiate debate take place this year. It was decided that it was too late in the season for another inter-collegiate debate this year, the R. V. C. having already debated with Queens, but that such might be considered next year.

A famous New York beauty has disappeared. Perhaps she washed it off.

-Rochester Herald

been appeased but the fear is stronger than it ever was before.

The eradication of this fear is a psychological problem. It must be borne in mind that Germany as a nation has been a chronic sufferer from a fear complex. It was this fear complex that made the German autocratic government possible, and Germany has had to suffer for it. France is in the same position. This terrible European situation is amenable to only one solution, that of the establishment of some adequate protection of nations against unjustified invasion. Fear caused the war; and since then that fear has been magnified a hundred fold. Nations are more than ever anxious, nervous, apt to take offense as the best means of defense. The problem is a personal one now-to end all war.

Idealists point to the League of Nations as the hope of the world. The power of the League, however is woefully inadequate. It is incapable of guaranteeing the world against disastrous and terrible wars. The tenth and sixteenth articles in its constitution are useless, and worse than useless. There is a plan, however, that would be completely satisfactory, that would make war a remote contingency. That plan is stated fully in a recently published book, "The Ethics of Modern World Problems." It provides for a Supreme World Court armed with a small but highly equipped air force capable of overcoming all opposition. This is the only plan that can achieve the desired result of banishing fears and heralding peace.

Sir Arthur Currie closed the meeting with a word of thanks. The next meeting of the Psychological Society will be held on February 28th. J. S. L. Browne will read a paper on the "Electrical Conductivity Theory of Nerves."

SCIENCE VS. ARTS DEBATE TUESDAY

Semi-Finals to be Held in Union

The debating teams of Arts and Science will meet in the semi-finals of the inter-faculty debating contest on Tuesday evening at 8.15 in the McGill Union. The subject for the debate is: "Resolved that an Arts course is a better training for citizenship than a Technical Education."

The speaker for Arts will be Shephard of Arts '26 who has gone through the inter-class debates in the inter-faculty. N. James of Arts '25, who is also looking toward theology and has won a reputation as literary man in college circles; and Cohen of Arts '24. Science will be represented by: Muller, Ross, and Boyd all of whom have proved themselves on the platform as well as in the lab.

The winning team will debate with the Theologs, who recently won from Law, on the 18th in the finals.

In the intercollegiate debating series Queens will be debating here on the 28th and at the same time McGill will have a team at Toronto.

University of California, Berkeley Cal.

University of California, Feb. 1- (By P. I. N. S.)-Preferences for 14 religious denominations were expressed by 479 of the 790 entrants to the University in January, according to a religious census made public yesterday by the University. Y. M. C. A. and the Y. W. C. A. The remaining 311 were affiliated with no church and expressed no preference. Of the new students expressing a preference, 84 were Presbyterians, 80 were Methodists, while 75 were Catholics. Other of the statistics contained in the census are as follows: Episcopal, 57; Christian Science, 37; Congregational, 34; Jewish, 28; Baptists, 22; Lutheran and Greek Orthodox, 30; Unitarians, 7; Mormons and Latter Day Saints, 6; Universalists, 2; and Mohammedans, 1.

Professor: Your last paper was very difficult to read. Your work should be written so that even the most ignorant will be able to understand it.

Student: Yes, sir. What part didn't you understand?
